

DRYER – Contamination Control

REGION:	North America
MACHINE:	PM2
POSITION:	1st UnoRun
GRADE:	Corrugating Medium
BASIS WEIGHT:	26-36 lb (130-180 gsm)
SPEED:	3500 FPM (1066 MPM)

 SpeedTec™

OBJECTIVES:

Improve dryer fabric cleanliness.

BACKGROUND:

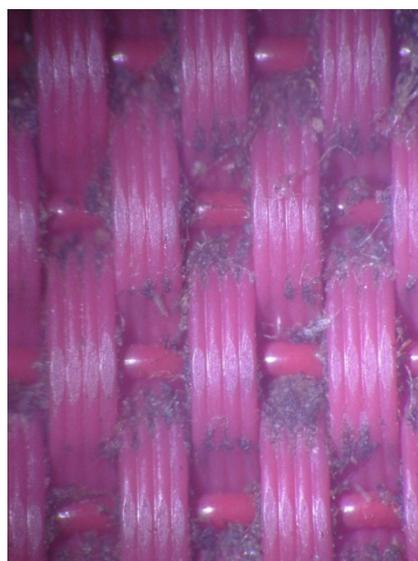

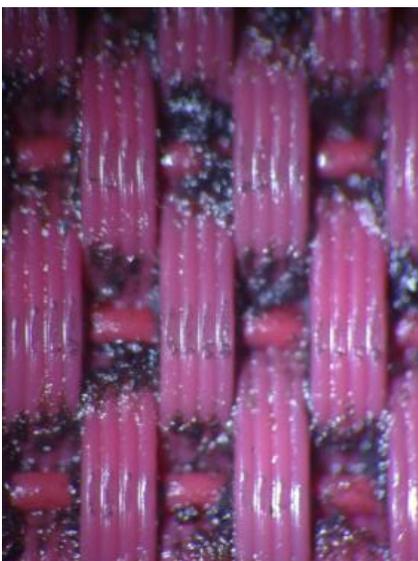

- Stickies were building up on the dryer fabric, causing issues with tail threading and sheet handling. Once the fabric lost significant air perm, it was removed.

RESULTS

SpeedTec™, with its grooved warp yarns, allowed for easier cleaning that resulted in less sticky buildup.

Prior fabric after washing every week.

SpeedTec™ fabric after washing once per month.
