

# Pulp Forming Case Study

REGION: EURASIA  
 MACHINE: MB Former  
 POSITION: Centurion® PLUS (bottom)  
 Centurion® 300P (top)  
 GRADE: Kraft Pulp  
 BASIS WEIGHT: 1140 g/m2  
 SPEED: 220 m/min  
 FURNISH: Softwood 80% / Hardwood 20%

## RESULTS

- Average bottom forming fabric life more than doubled
- Average top forming fabric life increase by 30%
- No issue during production
- Official one year contract received with an promise to add one extra year

## VALUE

- Drastic reduction in top and bottom fabric consumption
- World-class formation and throughput
- Secured long term supply chain

## OBJECTIVES:

Match the performance and life time of competition to secure the trial conditions.
